

Honda Power!

Turbocharger Power Packages

The original sport compacts. Honda Civic and Integra. Excellent handling and and reasonably priced, they took on all comers in the corners, but fell behind at the drag-strips. Until the equalizer showed up - forced induction! With 34+ years of turbo-charging experience, nobody knows force fed power like AVO.

AVO has devoted thousands of hours of research and development towards one goal. More power! The result is the AVO Power Package, designed for 1.5 and 1.6-liter Honda engines. This complete kit is easy to install thanks to our comprehensive installation guides. What makes this kit special is attention to detail, with AVO's own specially designed high-temperature cast manifold, huge bar and plate front mount intercooler, and all the necessary aluminum intercooler piping and other pieces included in this package. And our single-cartridge ball-bearing Garrett® turbocharger spools quicker and produces more power than a comparable non ball-bearing turbocharger.

AVO's turbocharger kit includes:

- Garrett ball bearing S-Type or optional R-Type turbocharger with internal waste gate for the best response and performance available.
- Ni-Resist high-temperature cast turbo exhaust manifold with stainless steel manifold heat shield.
- High temperature Inconel exhaust studs.
- Cast turbo outlet
- Mandrel bent stainless steel front pipe, which bolts either to original factory cat converter or to original first muffler.
- Bar and plate Front mount intercooler core
- Intercooler pipe work in powder coated or chromed mandrel bent steel plus Kevlar reinforced high-pressure, high temperature rubber.
- AVO dual intake power filter
- Where required AVO Sequential Blow-Off Valve for better response and turbocharger reliability.
- High pressure silicon hose joiners.
- High quality stainless steel hose clamps.
- ECU options from a full engine management system to an auxiliary fuel system for an extra injector setup. Full plug-in adaptor looms for easy and accurate installation.
- Full fitting instructions.
