

AVO

turboworld™

www.avoturboworld.com

The AVO stage packages for the XR6 Falcon turbo is a result of an intensive research and development program combined with decades of Ford experience. We wanted factory-level fit and finish to go hand-in-hand with superior performance!

STAGE 1

Quicker throttle response and a smoother power delivery are yours with the AVO Stage 1 package. AVO's kit will give a 10% increase in power, from approximately 192Kw ATW to 212Kw ATW. This is noticeable through the entire rev range!

Supply only \$1100.00(Inc GST)

Supply and fitted with a custom tune \$1650.00(Inc GST)

Stage 1 includes:

SCT Flash Tuner w/AVO custom ECU Re-flash

Hi-flow AVO flat panel filter

STAGE 2

You'll ask yourself why the XR6 wasn't delivered like this from the factory after you experience the crisper throttle response and the instant power available everywhere in the rev range. A 25% increase in power (240Kw ATW) along with AVO's custom tune improves drivability tremendously.

Supply only \$3740.00(Inc GST)

Supply and fitted with a custom tune \$4620.00(Inc GST)

This kit includes Stage 1 plus:

660cc bolt-in fuel injectors

3 inch full Stainless Steel exhaust system

AVO custom ECU Re-flash for Stage 2

STAGE 3

Now we are talking! A 60% increase in power translates to mind-blowing acceleration all the time, any time! With the addition of the AVO front mount intercooler kit, the XR6 will see a vast improvement in throttle response from low-down all the way to redline. Vehicle power will increase from 192Kw ATW to 308Kw ATW at 12psi of boost!

Supply only \$5720.00(Inc GST)

Supply and fitted with custom tune \$7700.00 (Inc GST)

This kit includes Stage 1 and 2 plus:

AVO bar & plate aluminium front mount intercooler kit

Larger wastegate flapper valve

Bolt-in high-flow in-tank Fuel Pump

AVO custom ECU Re-flash for Stage 3
